

When expertise *really* counts:
Fuel Proof Highway Tow Browsers

Available in:
 990L | 1600L | 2000L | 2300L

Fuel Proof's range of highway tow aviation fuel browsers provides a superb mobile refuelling solution, giving you more flexibility on when and where you can refuel.

Built in accordance with all current aviation fuel storage regulations, our highway tow aviation fuel browsers provide an excellent solution for refuelling aircraft. They are also suitable for use with both Avgas and Jet A-1.

The tank is fully banded and baffled and constructed entirely from stainless steel. The full height cabinet and roller shutter provide excellent access to the dispensing equipment, making the refuelling operation safer and easier. The tank is mounted to a galvanised tubular steel chassis, with a twin axle configuration giving excellent stability.

See overleaf for full specifications:

When expertise *really* counts:

Fuel Proof Highway Tow Browsers

Available in:

990L | 1600L | 2000L | 2300L

Key features:

- All stainless steel construction
- Easy access cabinets housing fuel dispensing equipment
- Available with hand operated, electric and diesel engined pumps
- Suitable for use with Avgas and Jet A-1
- Built in accordance with CAA guidelines for aircraft re-fuelling equipment
- High security specification
- Industry leading warranty

Full specification:

- Tough, fully baffled stainless steel inner tank
- Stainless steel outer construction incorporating roll over protection
- Lockable cabinet with roller shutter door for access to fuel dispensing and filtration equipment
- Lockable door for easy access to pumping equipment
- Tough galvanised tubular steel chassis fitted with rear bumper and galvanised mudguards
- Overrun brake system, handbrake and heavy duty jockey wheel
- Auto-reverse braked axles
- Fully compliant trailer (European Single Vehicle Type Approval No. e4 2007 46 0197 FPT2)
- Rotary tank contents gauge
- Earth bonding reel with controlled retraction
- Quick release manway for inspection with pressure vacuum
- Overturn spill prevention valve
- Full ADR tanker approval and certification

Included dispensing equipment:

GPI HP 100 high flow hand pump 50 litres per minute flow rate

Parker Hannafin FBO14 filter housing with Facet Monitor filter 0.5 micron

6 metre x 1 inch Elaflex aviation Hose

ZVF25 nozzle

Fill Rite mechanical flow meter

15m earth bonding reel, fire extinguisher, offset fill pipe

Sump pump and sample line

2000 litre highway tow aviation fuel browser

Full height fuel cabinet for easy access to dispensing and filtration equipment

Roll over protection and manway

Fuel Proof Highway Tow Bowers

Available in:

990L | 1600L | 2000L | 2300L

Pump Options

These options can be customised to suit your unique requirements.

Hand Pump

GPI HP 100 high flow hand pump 50 litres per minute flow rate

12volt Electric Pump

Gespasa 12v Electric pump approx 55 litres per minute flow rate

Battery compartment with charger and isolator

Diesel Engined Pump

Electric start Richard Hill Diesel engine driven pump

Battery compartment with charger and isolator

Hand pump option

Rear cabinet with 12v battery

Cabinet with diesel engined pump

Hose and Reel Options

These options can be customised to suit your unique requirements.

14 Metre Stainless Steel Hose Reel

14 metre x 1 inch Elaflex aviation hose

Spring rewind with locking mechanism

23 Metre Steel Hose Reel

Only available on 2000 Litre with extended cabinet

23 metre x 1 inch Elaflex aviation hose

Spring rewind with locking mechanism

Aviation Fuel Filter

High quality aviation grade fuel filtration systems

Parker Hannafin filter housing with Facet 0.5 micron filter unit
